DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3, drawn to a polypeptide comprising SEQ ID No: 2 or 4; or a polypeptide of SEQ ID No: 2 or 4 having 1-10 deletions, substitutions and/or insertions.

Group II, claim(s) 4-6, drawn to a polynucleotide encoding a polypeptide of Group I, an expression vector and transformed cell.

Group III, claim(s) 7-8, drawn to a method for screening a binding inhibitor between the polypeptides of SEQ ID No: 2 or 4 and CAP.

Group IV, claim 9, drawn to a method for screening an agent for improving insulin resistance and/or an agent for improving glucose metabolism.

Group V, claim 10, drawn to a method for producing a pharmaceutical composition for improving insulin resistance.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: GenBank accession number BQ070301 is a cDNA molecule which comprises all the nucleotide bases that encode all 175 amino acids of SEQ ID No: 2 of the instant application and is 100% identical to SEQ ID No: 2 from bases 21-545. (See attached sequence alignment).

Therefore, the technical feature linking the inventions of Groups I-V does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not differentiate the claimed subject matter as a whole over the prior art. Since according to PCT Rule 13.2 the presence of such a common or corresponding special technical feature is an absolute prerequisite for unity to be established, and given that there does not appear to be any other technical feature common to the claimed subject matter as a whole which might be able to fulfill this role, the currently claimed subject matter lacks unity of invention according to PCT Rule 13.1.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suzanne M. Noakes, Ph.D. whose telephone number is 571-272-2924. The examiner can normally be reached on Monday to Friday, 7.30am to 4.00pm.
